Proceedings of the 14<sup>th</sup> International Symposium on Operational Research, ki so ga uredil prof. dr. Lidija Zadnik Stirn, prof. dr. Mirjana Kljajić Borštnar, prof. dr. Janez Žerovnik in doc. dr. Samo Drobne bo **eferiran** v: ISI (Index to Scientific and Technical Proceedings on CD-ROM and ISI/ISTP&B online database), Current Mathematical Publications, Mathematical Review, MathSci, Zentralblatt für Mathematics, Mathematics Abstracts, MATH on STN International CompactMath, INSPEC, Journal of Economic Literature.

Referati v zborniku del so razdeljeni v šestnajst poglavij (številka v oklepaju pomeni število prispevkov v sekciji): Plenary Lectures (5); sedem posebnih sekcij: Advances in Modelling and Statistical Research of the Western Balkan Countries in the Times of Economic Crisis (8 papers), High-Performance Computing and Big Data and General OR Topics (8), Logistics (5), MCDM – Software and Applications (6), Metaheuristic Optimization (5), MRP and Related Systems Approach to Industrial Engineering and Services (5), Systems Optimization and Control with Applications (5); in osem sekcij: Econometric Models and Statistics (10), Environment and Human Resources (6), Finance and Investments (5), Location and Transport, Graphs and their Applications (6), Machine Learning (4), Mathematical Programming and Optimization (8), Multiple Criteria Decision Making (4), and OR Perspectives: Where we have been, where we can go (3).

Vsebina in struktura prispevkov je bila tokrat nekoliko usmerjena v korist problemskim sklopom, čeprav je bilo tudi veliko zelo kakovostnih metodoloških prispevkov. Opazno je, da se operacijske raziskave vse bolj vključujejo v neposredne gospodarske probleme; navkljub velikemu številu udeležencev, ki so običajno avtorji, zlasti teoretičnih prispevkov, z univerz in raziskovalnih inštitutov. Nadalje je potrebno poudariti, da je bilo med avtorji veliko predstavnikov mlajše generacije, kar pomeni, da imajo operacijske raziskave tudi, kar se tiče kadrov, svetlo prihodnost.

Kot v preteklih letih (SOR'05, SOR'07, SOR'09, SOR'11, SOR'13 in SOR'15), smo žal tudi ob tem dogodku opazili, da je bila kljub pravočasnemu in ustremnemu informirjanju občutna premajhna odzivnost uporabnikov OR-raziskovanja; pri tem mislimo tako zastopnike javnih sistemov kot na zastopnike industrije. To so predvsem energetski, okoljevarstveni, elektroenergetski, gradbeniški, transportni, vojaški strokovnjaki, med drugimi so to strokovnjaki iz managementa industrijskih podjetij in proizvodnje. To so skratka vsi tisti, ki bi pri svojem delu morali intenzivno uporabljati metode OR. V primeru, da bi bilo srečanje tako izpopolnjeno, k čemur bienalni simpoziji iz OR težijo, bi lahko prišlo že v okviru simpozija do začetka reševanja problemov, ki se v Sloveniji v okviru OR s praktičnega stališča zdijo kritični. To so predvsem identifikacija problemov in identifikacija ljudi ter skupin, ki se tako na strani uporabnikov kot na strani izvajalcev lahko soočijo z njimi. V takšnem primeru bi lahko prišlo do zametka primernih delovnih skupin. Smatramo, da bi se v bodoče moralno Ministrstvo za gospodarstvo bolj aktivno vključiti v delo simpozija.

Na koncu lahko ugotovimo, da je SOR'17, ki je tokrat obeležil že 14. izvedbo, presegel naša pričakovanja tako v strokovnem kot tudi moralnem pogledu. Velika udeležba tujih strokovnjakov je potrdila zaupanje v naše strokovne sile, obenem pa nudila domačim strokovnjakom priložnost, da se seznanijo z dosežki, ki razvitemu svetu pomenijo generator njihove diferencialne rente.

SOR'17 je finančno podprt PRACE (Partnership for Advanced Computing in Europe).
