

Dear colleagues:

I'd be happy if you spread the following information in your OR community.

Thanks a lot,

Alf Kimms

(President-Elect of the German OR Society)

YouTube-Tutorial on Mathematical Modeling

Alf Kimms <alf.kimms@uni-due.de>

Beginners in Operations Research usually find it difficult to formulate a model on their own or to fully understand a model without the support of an advisor. Students get better over time by studying more and more examples. In this way they learn how to formulate a mathematical model. The idea behind this online tutorial is to support the learning process. Typical tips and tricks are explained in a series of short videos.

This material is for an audience in the early stage of the operations research experience. Things are explained on a very basic level. Bachelor and master students will benefit most.

The videos can be found on YouTube. A playlist link can be retrieved from the following website:

<https://www.log.msm.uni-due.de/lehre/youtube-tutorial-modellierung/>

If you find this interesting, it would be very much appreciated if you communicated this link to your students by referencing the video playlist in your course material or by adding a link to your website for instance. I hope that your students can benefit from it.

Thanks a lot and take care,

Alf Kimms

(President-Elect of the German OR Society)
