Be Part of Europe's AI Skills Standard: Join the Initiative

Europe is taking a decisive step toward building a strong and future-proof AI workforce. A new initiative, led by DIGITALEUROPE in collaboration with UNE – Asociación Española de Normalización and ARISA – AI Skills partners, is developing the first standardised set of AI role and educational profiles designed specifically for Europe's needs.

BHT and HTW Berlin Launch Intersectional Research to Boost Women in Tech

A new joint research project by Berliner Hochschule für Technik and HTW Berlin explores how intersectionality can unlock gender diversity in IT. By examining how factors like gender, origin, age, and career path combine to create unique barriers, the study aims to provide practical tools for making the IT industry more inclusive and equitable.

In Memoriam: Dr. Bálint Dömölki

It is with great sorrow that we share the passing of Dr. Bálint Dömölki, a leading figure in Hungarian computer science. He played an instrumental role in creating Hungary's first computer, the M-3, and led foundational efforts in the Hungarian system programming school, formal program specification, artificial intelligence, and internationally recognized software.
