Proceedings of the 15th International Symposium on Operational Research, ki so ga uredili prof. dr. Lidija Zadnik Stirn, prof. dr. Mirjana Kljajić Borštner, prof. dr. Janez Žerovnik, doc. dr. Samo Drobne in izr. prof. dr. Janez Povh bo **eferiran** v: ISI (Index to Scientific and Technical Proceedings on CD-ROM and ISI/ISTP&B online database), Current Mathematical Publications, Mathematical Review, MathSci, Zentralblatt für Mathematics, Mathematics Abstracts, MATH on STN International CompactMath, INSPEC, Journal of Economic Literature.

Referati v zborniku del so razdeljeni v šestnajst poglavij (številka v oklepaju pomeni število prispevkov v sekciji): Plenary Lectures (5); sedem posebnih sekcij: Application of Operation Research in Agriculture and Agribusiness Management (5), Formal and Behavioral Issues in MCDM (7), Graph Theory and Algorithms (12), High-Performance Computing and Big Data (4), Optimization in Human Environments (7), System Modelling & Soft Operational Research (5), Towards Industry 4.0 (5), in osem sekcij: Econometric Models and Statistics (10), Environment and Social Issues (6), Finance and Investments (11), Location and Transport, Graphs and their Applications (4), Mathematical Programming and Optimization (9), Multi-Criteria Decision-Making (6), Human Resources (4), and Production and Management (6).

Vsebina in struktura prispevkov je bila tokrat nekoliko usmerjena v korist problemskim sklopom, čeprav je bilo tudi veliko zelo kakovostnih metodoloških prispevkov. Opazno je, da se operacijske raziskave vse bolj vključujejo v neposredne gospodarske probleme; navkljub velikemu številu udeležencev, ki so običajno avtorji, zlasti teoretičnih prispevkov, z univerz in raziskovalnih inštitutov. Nadalje je potrebno poudariti, da je bilo med avtorji veliko predstavnikov mlajše generacije, kar pomeni, da imajo operacijske raziskave tudi, kar se tiče kadrov, svetlo prihodnost.

Kot v preteklih letih (SOR'05 do SOR'17), smo žal tudi ob tem dogodku opazili, da je bila kljub pravočasnemu in ustreznemu informirjanju občutna premajhna odzivnost uporabnikov OR-raziskovanja; pri tem mislimo tako zastopnike javnih sistemov kot na zastopnike industrije. To so predvsem energetski, okoljevarstveni, elektroenergetski, gradbeniški, transportni, vojaški strokovnjaki, med drugimi so to strokovnjaki iz managementa industrijskih podjetij in proizvodnje. To so skratka vsi tisti, ki bi pri svojem delu morali intenzivno uporabljati metode OR. V primeru, da bi bilo srečanje tako izpopolnjeno, k čemur bienalni simpoziji iz OR težijo, bi lahko prišlo že v okviru simpozija do začetka reševanja problemov, ki se v Sloveniji v okviru OR s praktičnega stališča zdijo kritični. To so predvsem identifikacija problemov in identifikacija ljudi ter skupin, ki se tako na strani uporabnikov kot na strani izvajalcev lahko soočijo z njimi. V takšnem primeru bi lahko prišlo do zametka primernih delovnih skupin. Smatramo, da bi se v bodoče moralno Ministrstvo za gospodarstvo bolj aktivno vključiti v delo simpozija.

Na koncu lahko ugotovimo, da je SOR'19, ki je tokrat obeležil že 15. izvedbo, presegel naša pričakovanja tako v strokovnem kot tudi moralnem pogledu. Velika udeležba tujih strokovnjakov je potrdila zaupanje v naše strokovne sile, obenem pa nudila domačim strokovnjakom priložnost, da se seznanijo z dosežki, ki razvitemu svetu pomenijo generator njihove diferencialne rente.

SOR'19 sta finančno podprla EURO (Association of European Operational Research Societies) in PRACE (Partnership for Advanced Computing in Europe).
